Fanaskov, Vladimir
Gaussian belief propagation solvers for nonsymmetric systems of linear equations. (English) [Zbl 07456290]

MSC:
65F10 iterative numerical methods for linear systems
65F50 Computational methods for sparse matrices
62M99 Inference from stochastic processes

Keywords:
umerical linear algebra; belief propagation; LU decomposition; linear systems; geometric multigrid

Software:
PowerGraph

Full Text: DOI

References:

This reference list is based on information provided by the publisher or from digital mathematics libraries. Its items are heuristically matched to zbMATH identifiers and may contain data conversion errors. It attempts to reflect the references listed in the original paper as accurately as possible without claiming the completeness or perfect precision of the matching.
